

Erna V. Ivarsdottir, PhD

Erna V. Ivarsdottir is a Scientific Associate Director at Amgen deCODE Genetics in Reykjavík, Iceland, where she leads statistical efforts in inflammation research and proteomics. Since joining deCODE in 2014, Erna has contributed to research across a broad range of disease areas, including inflammatory, cardiometabolic, and oncological diseases. Her research focuses on applying statistical and computational methods to large-scale genetic and proteomic datasets to support therapeutic target discovery and deepen understanding of disease biology.
